SUMMARY

MERN Stack Developer with 1.5 years of hands-on experience building scalable, responsive, and user-friendly web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing RESTful APIs, implementing authentication and authorization systems using JWT, and managing full-stack application workflows. Proficient in creating modern frontend interfaces with React.js and Tailwind CSS while ensuring backend performance and database efficiency. Experienced in working with Git/GitHub, API integration, and deploying production-ready applications. Strong problem-solving abilities with a passion for clean code, continuous learning, and delivering high-quality software solutions.

TECHNICAL SKILLS

Cloud Platforms: Azure

Frontend Development: React, HTML5, CSS3, Javascript(ES6+) Tailwind CSS, Responsive Web Design, React Hooks

Backend Development: Node.js, Express.js, RESTful APIs, JWT Authentication, API Testing with Postman

DevOps & Tools: Git & GitHub, Environment Configuration, Deployment & Hosting.

Database & Storage: MongoDB, MySQL, Database Schema Design, CRUD Operations.

Workflow & Operating Systems: Team Collaboration, Windows OS

PROFESSIONAL EXPERIENCE

Softcadd Technologies | Kharadi, Pune.

Jan 2025 - Present

- Developed and maintained full-stack web applications using the MERN stack including React, Node.js, Express.js, and MongoDB.
- Built responsive and reusable frontend components with React.js and Tailwind CSS, improving user experience and application performance across desktop and mobile platforms.
- Designed and integrated RESTful APIs for authentication, user management, and data handling, ensuring secure and efficient communication between frontend and backend systems.
- Implemented JWT-based authentication and authorization systems with protected routes.
- Managed MongoDB databases using Mongoose, optimized CRUD operations, and improved backend performance through efficient schema design and query handling.
- Collaborated with development teams using Git and GitHub for version control, feature integration, debugging, and deployment workflows.
- Worked on real-world projects including student management systems and portfolio applications, delivering scalable and production-ready solutions within project deadlines.
- Performed testing, debugging, and API validation using Postman and browser developer tools to ensure application stability and reliability.

PROJECT

Hotel Management System

- Designed and developed a hotel management system to streamline room booking, customer management, and billing operations.
- Built secure and efficient backend functionalities using Java and integrated MySQL for database management.
- Implemented modules for customer registration, room allocation, check-in/check-out, and payment tracking to improve operational efficiency.
- Developed a user-friendly interface for managing hotel records, reservations, and customer details with accurate real-time data handling.
- Optimized database queries and application workflow to ensure fast performance, reliable data storage, and smooth system operations.

Portfolio

- Designed and developed a modern, responsive personal portfolio website to showcase projects, technical skills, and professional experience.
- Built reusable UI components using React.js and Tailwind CSS to ensure clean design, fast performance, and mobile responsiveness across devices.
- Implemented smooth navigation, interactive animations, and optimized layouts to enhance user experience and accessibility.
- Integrated project sections, contact forms, and social/profile links to create a professional online presence for recruiters and clients.
- Deployed the application on Vercel for reliable hosting and continuous availability.
- Live Project: [Portfolio Website](#)
