Profile

MERN Stack Developer with 3+ years of experience in designing, developing, and maintaining scalable web applications using MongoDB, Express.js, React.js, and Node.js. Strong experience in frontend development using React.js, JavaScript, HTML5, CSS3, Bootstrap, and Material UI. Experienced in developing RESTful APIs using Node.js and Express.js and integrating frontend applications with backend services. Good knowledge of MongoDB database design, Mongoose, CRUD operations, aggregation, and query optimization. Hands-on experience with JWT authentication, role-based authorization, Git, Docker, CI/CD, and Agile development.

Technical Skills

Frontend: React.js, JavaScript ES6+, HTML5, CSS3, Bootstrap, Material UI
React: Components, Props, State, Hooks, Context API, React Router, Redux
Backend: Node.js, Express.js, REST APIs, Supabase
Database: MongoDB, Mongoose, MySQL
State Management: Redux, Redux Toolkit, Context API
API Integration: Axios, Fetch API, REST APIs
Security: JWT, Authentication, Authorization, Role-Based Access
Testing: Jest, React Testing Library, Postman
Tools: Git, GitHub, Jira, Swagger, VS Code
DevOps: Docker, Jenkins, CI/CD
Cloud: AWS / Azure
Methodology: Agile, Scrum

Experience

MERN STACK DEVELOPER | CODEREACH SOFTWARE PVT. LTD | JULY 2023 – PRESENT

PROJECT: ProSearch – Job Search & Recruitment Portal

Technologies: React.js, JavaScript, Node.js, Express.js, MongoDB, Mongoose, Redux Toolkit, REST APIs, JWT, HTML5, CSS3, Bootstrap, Git, Postman

Description: ProSearch is a web-based **job search and recruitment platform similar to Naukri**, designed to connect job seekers with recruiters and companies. The application allows candidates to create profiles, upload resumes, search and filter jobs, apply for suitable positions, and track application status. Recruiters can create company profiles, post job openings, search candidate profiles, review applications, shortlist candidates, and manage the recruitment process.

Roles & Responsibilities

- Developed responsive and reusable UI components using **React.js, JavaScript, HTML5, CSS3, and Bootstrap** for job seeker and recruiter modules.
- Built and integrated **RESTful APIs using Node.js and Express.js** for user registration, profile management, job posting, job search, and job applications.
- Designed and managed **MongoDB collections using Mongoose** for candidates, recruiters, companies, jobs, and applications.

- Implemented **JWT-based authentication and role-based authorization** for Job Seeker, Recruiter, and Admin users.
- Developed **job search, filtering, sorting, and pagination** based on skills, experience, location, job title, and company.
- Implemented candidate features such as **resume upload, job application, saved jobs, and application status tracking**, along with recruiter-side candidate shortlisting.
- Used **Git, Postman, and Agile/Scrum practices** for source control, API testing, bug fixing, code reviews, and production support.

Project: Digital Banking & Customer Service Portal

Technologies: React.js, Node.js, Express.js, MongoDB, JavaScript, Redux Toolkit, REST APIs, JWT, HTML5, CSS3, Bootstrap, Git, Postman

Description: Developed a digital banking web application that allows customers to securely manage their accounts, view balances and transaction history, transfer funds, manage beneficiaries, and raise service requests. The application also provides bank employees with functionality to manage customer requests, account information, and transaction-related activities.

Roles & Responsibilities

- Developed responsive and reusable frontend components using **React.js, JavaScript, HTML5, CSS3, and Bootstrap** for customer and banking operations modules.
- Built and integrated **RESTful APIs using Node.js and Express.js** for customer profiles, accounts, beneficiaries, transactions, and service requests.
- Designed and managed **MongoDB collections using Mongoose** for customers, accounts, transactions, beneficiaries, and service request information.
- Implemented secure **JWT-based authentication and role-based authorization** to control access for customers, bank employees, and administrators.
- Developed banking functionalities such as **account balance viewing, transaction history, beneficiary management, fund transfer requests, and service request tracking**.
- Used **Redux Toolkit** for application state management and integrated frontend screens with backend services using Axios.
- Performed **API testing using Postman, bug fixing, code reviews, Git-based version control, and production support** while working in an Agile/Scrum environment.

Education

B. TECH IN COMPUTER SCIENCE | DBATU UNIVERSITY | JUNE 2020 – JUNE 2023
